Mandaluyong City, Philippines

## Professional Summary

---

Software Engineer with over 4 years of professional experience building and migrating complex web and mobile platforms, progressing from frontend development to full-stack ownership. Comfortable across the product surface from designing modular, white-label architectures and multi-step enrollment funnels to integrating AI-powered document analysis and authentication systems. Core stack: React, Next.js, TypeScript, Flutter, FastAPI, and Firebase.

## Experiences

---

**KreditHero Inc.** - BGC, Taguig City

Jul 2025 - Nov 2025

*Software Engineer*

- Migrated the authentication layer of a deal marketplace from Ory Kratos to Firebase Auth, integrating email verification flows and simplifying the identity stack for faster product iteration.
- Re-engineered loan application onboarding flows to improve lead capture completion, introducing a Save as Draft feature to accommodate non-linear, multi-session application journeys.
- Developed a role-based lending marketplace dashboard with AI-powered document analysis for fraud detection, supporting compliance review workflows across lender, borrower, and admin roles.
- Built a visual workflow engine using React Flow enabling banks and FinTech clients to design and automate document processing pipelines and compliance validation without direct engineering involvement.

**Serino Systems, Inc** - Makati City

Apr 2024 - Jul 2025

*Front-end Developer*

- Architected a multi-tenant admissions platform serving independent educational institutions, featuring a multi-step enrollment funnel and a real-time administrative dashboard for requirement verification.
- Built a white-label e-commerce platform using a modular mini-app architecture separating Navigation, Search, and Checkout into independently versioned packages enabling scalable deployment across multiple client brands from a single codebase.
- Modernized a legacy school management system into a scalable multi-tenant platform with automated certificate generation and a high-concurrency grade reporting pipeline built to support simultaneous access during peak enrollment.

**Vashcorp Inc** (Contractual) - Cubao City

Nov 2023 - Mar 2024

*Front-end Developer*

- Architected the frontend of a consumer-facing Buy Now, Pay Later (BNPL) platform, engineering multi-step registration flows with biometric face verification to meet regulatory KYC requirements.
- Integrated the PayMongo payments API into the checkout experience, enabling e-wallet linking and secure transaction initiation for end users.

**Volenday Group** - Makati City  
*Front-end Developer*

Nov 2021 - Nov 2023

- Led the migration of three client-facing platforms a media portal, internal ticketing system, and armored vehicle tracking application from React.js to Next.js, improving rendering performance and long-term maintainability across all three products.
- Maintained two production mobile applications for a safety equipment supplier, supporting product browsing, side-by-side product comparison, and real-time environmental suitability checks.
- Owned the full development lifecycle of an ISO compliance management system, digitalizing manual operational workflows and improving cross-department audit readiness.

**Raksquad Tech Corp.** - Mandaluyong City  
*Software Engineer Intern*

Jul 2021 - Sep 2021

- Maintained and enhanced a production Voucher Management System, delivering targeted feature improvements and resolving active defects to support ongoing business operations.
- Improved database reliability and query performance through schema normalization, strengthening long-term data integrity across core system tables.

**Village88** - San Fernando City, La Union  
*Software Engineer Intern*

Mar 2021 - May 2021

- Delivered a full-stack e-commerce capstone application using Node.js, Express, MySQL, jQuery, and TailwindCSS, covering end-to-end development from database schema to user interface.
- Gained hands-on exposure to containerized development environments using Docker.

## Education

---

**Saint Louis College - City of San Fernando La Union**  
*Bachelor of Science in Information Technology | 2022*

## Skills

---

**Frontend:** React, Next.js, TypeScript, JavaScript, TailwindCSS, Flutter

**UI Libraries & Design:** Mantine UI, ShadCN, Ant Design, Chart.js, Storybook, Figma

**State Management & Data Fetching:** Redux, Zustand, TanStack Query

**Backend & Databases:** Node.js, Express.js, FastAPI, Firebase, MySQL, MongoDB

**Testing & Tools:** Jest, React Testing Library, Git (GitHub, GitLab, Bitbucket), Jira

**Cloud & AI Services:** Google Cloud Platform (GCP), Vertex AI, Docker
